ABSTRACT -

This report provides annual information for the 2000-2001 school year on grade-level retention in the Texas public school system, based on the Public Education Information Management System. Data on retention are provided by grade, socioeconomic status, ethnicity, gender, participation in special education, degree of English proficiency, and performance on the Texas Assessment of Academic Skills (TAAS). In 2000-2001, the state retention rate for all grades was 4.7%, a rate unchanged from the previous 2 years. Across grades K-6, retention was highest in grade 1, at 6.3%. Across grades 7 through 12, retention was highest in grade 9, at 17.4%. Disparities in retention rates across ethnic groups were significant. In elementary school, Hispanic and African American students were more than twice as likely to be retained as white students. At the secondary level, about one of four African American students and almost one in four Hispanic students in grade 9 did not accumulate enough credits to advance to grade 10. Depending on grade level and subject, between 83.9% and 94.7% of students who were promoted in grades 3 through 8 had passed the reading or mathematics portions of the TAAS. After repeating the grade, TAAS scores of retained students improved. Four appendices contain supplemental information about grade retention. (Contains 28 tables and 20 figures.) (SLD)

Abstract. This report provides annual information for the 2000-01 school year on grade-level retention in the Texas public school system, based on the Public Education Information Management System. Data on retention are provided by grade, socioeconomic status, ethnicity, gender, participation in special education, degree of English proficiency, and performance on the Texas Assessment of Academic Skills (TAAS).

Keywords. Retention, retention rate, special education, TAAS, English proficiency, economically disadvantaged.

Highlights

- In 2000-01, the state retention rate for all grades was 4.7 percent. The rate was unchanged from the previous two years.
- Across Grades K-6, the retention rate was highest in Grade 1 at 6.3 percent. Across Grades 7-12, the retention rate was highest in Grade 9 at 17.4 percent.
- The disparities in retention rates across ethnic groups were significant. In
 elementary school, Hispanic and African American students were more than
 twice as likely to be retained as White students. At the secondary level, about
 one out of four African American students and almost one out of four
 Hispanic students in Grade 9 did not accumulate enough credits to advance to
 Grade 10.
- Depending on grade level and subject, between 83.9 and 94.7 percent of students who were promoted in Grades 3-8 had passed the reading or mathematics portions of the English-version Texas Assessment of Academic Skills (TAAS) in spring 2001, whereas 23.3 to 60.7 percent of students who were retained had passed. After repeating the grade, the TAAS scores of retained students improved. Between 67.7 and 87.8 percent of them passed when they took the tests at the end of their second year.
- Of the Grade 3 students who passed the reading TAAS in spring 2001, 99.4 percent were promoted to Grade 4. Of the Grade 3 students who did not pass the reading TAAS, 11.2 percent were retained in Grade 3 the next year.
- Over 99 percent of students in Grades 4-8 who passed the reading and mathematics TAAS in spring 2001 were promoted to the next grade level. Of those students who did not pass both subjects, between 3.5 and 8.1 percent, depending on the grade level, were retained at the end of the year.

Promotion Policies in Texas

Promotion Policies in Texas

Texas educational policy has held consistently that student promotion decisions be based on academic achievement. Over the past two decades, though, the policies surrounding student promotion decisions have evolved. Initially, Texas state laws and State Board of Education (SBOE) rules pertaining to retention and promotion were designed to establish consistent promotion policies at the local level. Alternatives to retention were encouraged and funding was provided for retention reduction programs. Between 1984 and 1993, revisions of the law and rules gave school districts greater flexibility in deciding the most appropriate academic settings for individual students. In 1995 and 1996, the remaining regulations were repealed. In 1999, state standards were established for advancement at Grades 3, 5, and 8, and resources were made available to districts to prepare all children to meet the standards beginning with Grade 3 by 2003.

Legislation passed in 1984 required that students be promoted only on the basis of academic achievement and disallowed social promotion (Texas Education Code [TEC] §21.721 Grade Requirement for Advancement or Course Credit, 1986). The SBOE rules implementing the legislation, Promotions and Alternatives to Social Promotion (Title 19 of the Texas Administrative Code [TAC] §§75.191-195, 1985), outlined the grading procedures to be used by districts and guidelines for promotion. The rules included the provisions that no student could repeat the same grade more than once or repeat more than two grade levels during the elementary grades.

In 1987, legislation was enacted to expand TEC §21.557 Compensatory and Remedial Instruction. The legislation provided a definition of students in Grades 7-12 considered to be at risk of dropping out of school and required districts to provide remedial and support programs for these students (TEC, 1988). The definition of "at-risk" students included students who had not advanced from one grade level to the next in two or more school years.

In 1991, the rule prohibiting retention of students below Grade 1 was amended to allow districts to assign six-year-old students who were not developmentally ready for the first grade to grades deemed appropriate by the schools (19 TAC §75.195(j), 1992 Supplement).

Also in 1991, legislation updated TEC §21.721 to eliminate the prohibition on advancement of students with grade averages below 70. Policies on advancement from one grade level to the next were to be adopted by school districts. Local policies on promotion had to incorporate a variety of factors, including a

minimum, yearly grade point average of 70, grades in each subject, performance on the TAAS, extenuating circumstances, and the judgments of parents and teachers. Districts were required to consider alternatives to retention, including extended school day, extended school year, specialized tutorial support, peer tutoring, cross-age tutoring, student mentoring, and summer programs (TEC, 1992).

A Retention Reduction Grant Program was enacted in 1993 (TEC §21.562, 1994). A \$5 million appropriation allowed 54 Texas school districts to pilot extended instructional programs to eliminate retentions in first grade during the 1992-93 school year. The Retention Reduction Grants allowed school districts and campuses to offer programs based on lengthening the school year as an alternative to retention. These programs provided additional instruction to students who needed extra assistance to master the "Essential Elements"—the state-mandated curriculum in the first grade. The pilots were extended to the second grade in 1994-95.

School districts not receiving Retention Reduction Grants could apply to the commissioner of education for approval to provide extended year programs (TEC §21.563 Optional Extended Year Program, 1994). Optional Extended Year Programs (OEYPs) of up to 45 days in length could be provided to students in Grades K-8 who would otherwise be retained. To fund the programs, school districts could reduce the number of instructional days during the regular school year by five.

In 1995, the Texas Education Code was reviewed and readopted. In the new code, the provisions on promotion, *Student Advancement*, reiterated that students be promoted only on the basis of academic achievement or demonstrated proficiency in the subject matter of the course or grade level (TEC §28.021, 1996). At the same time, the language regulating local promotion and retention policies was repealed. In April 1996, the SBOE rules regulating local policies, including restrictions on the number of times students could be retained in grade, were also repealed. The definition of students at risk of dropping out was carried forward (TEC §29.081, 1996).

The 1995 TEC revisions included a single set of provisions for extended year programs (TEC §29.082, 1996). Commissioner of Education rules implementing the OEYP were adopted to be effective in May 1996 (19 TAC §105.1001, 1997). Districts were required to advance students who attended at least 90 percent of the

extended year program days unless the parents requested otherwise. The principal, teacher, and counselor were required to meet with parents requesting retention and provide information on the effects of retention on future academic performance, student self-esteem, and high school completion. The commissioner of education was directed to withhold 5 percent of the Foundation School Program compensatory education allotment to finance extended year programs. This increased the allocation for extended year programs for students in Grades K-8 who were identified as not likely to be promoted to about \$50 million a year. Districts could use portions of their compensatory education allotments or apply for state funds to implement extended year programs. Although districts had to apply for state OEYP funds, they were no longer required to apply for approval to operate OEYPs funded locally.

The promotion policies that will be implemented in Texas public schools in 2002-03 build on the state curriculum and assessment programs that have been developed over many years. In 1984, Texas adopted a state curriculum known as the Essential Elements (19 TAC Chapter 75, Subchapters B-D, 1984). Over the years, the rigor of student knowledge and skills required has increased. A revised curriculum, the Texas Essential Knowledge and Skills (TEKS), was adopted by the SBOE and became effective on September 1, 1998 (19 TAC Chapters 110-128, 1998). By state law and SBOE rule, the TEKS in the foundation areas of English language arts and reading, mathematics, science, and social studies are required for use in instruction and statewide assessment. The TEKS have been widely distributed to schools and to the public. Professional development on TEKS implementation in the classroom has been widely available.

State criterion-referenced tests, or the Texas Assessment of Academic Skills (TAAS), were introduced in 1990. Since 1994, the TAAS has measured mastery of the state curriculum in reading and mathematics at Grades 3-8 and 10; in writing at Grades 4, 8, and 10; and in science and social studies at Grade 8. The Grade 10 tests serve as an exit-level examination. Since the TAAS exit-level examination was introduced, satisfactory performance has been a prerequisite to a high school diploma.

In 2002-03, a new, more rigorous state assessment system, the Texas Assessment of Knowledge and Skills (TAKS), will be introduced. Like the TAAS, the TAKS will be aligned with the state curriculum.

State testing procedures allow accommodations for students who need them. In some circumstances, students are exempted from the standard assessments. There are Spanish-language versions of the tests available in Grades 3-6 to assess the progress of students proficient in Spanish but not yet proficient in English. The Admission, Review, and Dismissal Committees responsible for students receiving special education services may specify alternate assessment instruments, including the State Developed Alternative Assessment (SDAA).

Since 1995, Texas statute has stipulated that "a student may be promoted only on the basis of academic achievement or demonstrated proficiency of the subject matter of the course or grade level" (TEC §28.021, 1996). In 1999, some specific provisions linking test performance, promotion, and instruction were added (TEC §28.0211, 1999). Beginning in 2002-03, students in Grade 3 will be required to pass the state reading test to advance to Grade 4. Students in Grades 5 and 8 will have to pass the reading and mathematics tests beginning in 2004-05 and 2007-08, respectively. Students will be given three opportunities to pass the tests. School districts are required to provide accelerated instruction in the subject areas failed after each test administration. An accelerated instruction group may not have a ratio of more than 10 students for each teacher. For students experiencing difficulties, accelerated instruction will provide the opportunity to engage in more intensive, more targeted, and more supportive reading and mathematics instruction. The goal is for students to acquire the skills needed to continue with their classmates.

If a student fails the test a second time, the district must establish a grade placement committee to determine the accelerated instruction the student will receive before the third testing opportunity. Each grade placement committee will consist of the principal or a designee, the parent or guardian of the student, and the teacher of the student in the subject of the test the student fails. The grade placement committee may determine the student should take an alternate assessment. A student who fails to perform satisfactorily on the third opportunity is to be retained. A parent or guardian may appeal the retention decision to the grade placement committee. The grade placement committee may decide in favor of advancement if committee members unanimously conclude, based on standards adopted by the local school board, that the student is likely to perform on grade level if given additional accelerated instruction during the next school year.

State initiatives have provided support in reading and mathematics to students in the grades leading up to the promotion requirements. In 1999, the 76th Texas Legislature approved the implementation of the Student Success Initiative to ensure that all students are reading at grade level by Grade 3. The Student Success Initiative has three components: professional development, instruments to diagnose and assess reading difficulties in Grades K-2, and accelerated reading instruction. Through the Initiative, Teacher Reading Academies were established. Training focused on kindergarten teachers in 1999-00, and on kindergarten and Grade 1 teachers in 2000-01. Training of Grade 2 teachers began in spring 2001, and of Grade 3 teachers in 2002. Fourth grade reading academies are scheduled to begin spring 2003. Diagnostic and assessment data are employed to identify struggling readers and monitor their progress. Significant levels of Accelerated Reading Instruction (ARI) intervention funding have been sent to districts to provide support for students identified as at-risk for reading difficulties on the basis of the results of early reading instruments in K-2 and diagnostic assessment data in Grade 3. Districts provided ARI intervention support to students in kindergarten in 1999-00; in kindergarten and Grade 1 in 2000-01; and in kindergarten, Grade 1, and Grade 2 in 2001-02; and kindergarten, Grade 1, Grade 2, and Grade 3 in 2002-03. Over \$415 million has been devoted to the Student Success Initiative in reading since 1999-00. In 2001, the 77th Legislature appropriated funding for the Texas Math Initiative, an algebra readiness initiative focused on Grades 5-8. Professional Development Institutes for teachers in Grades 5 and 6 began spring 2002 with Grade 7 and 8 teacher training beginning spring 2003. In addition to teacher training, the math initiative also features a research and evaluation component; on-line diagnostic assessment; a Master Mathematics Teacher certification program; after-school and summer program grant funding; and a pilot homework and grading service for teachers and parents.

Definitions and Calculations

Grade retention has traditionally been defined as "the practice of requiring a child to repeat a particular grade or requiring a child of appropriate chronological age to delay entry to kindergarten or first grade" (Rafoth, Dawson, & Carey, 1988). This definition of retention—delayed entry or repetition of a grade—applies primarily to Grades K-6. The same grade level in successive years in high school does not necessarily represent the repetition of a full year's curriculum, as it does in elementary school. Secondary school programs are structured around individual courses. Because passing and failing are determined at the level of the course and credits are awarded for courses completed successfully, the concept of a "grade level" becomes more fluid. Students who fail to earn credit in a single course or take fewer courses than required in one year may be classified at the same grade level in two consecutive years. Practices in Grades 7 and 8 may be like those in elementary school or like those in high school, depending on local school district policies.

Data on the grade levels of all students in the Texas public school system were available in the Public Education Information Management System (PEIMS) (Texas Education Code [TEC] §29.083, 1996). Data regarding student characteristics and program participation were also available in PEIMS. Data on Texas Assessment of Academic Skills (TAAS) performance were provided to the Texas Education Agency (TEA) by the state's contractor, NCS Pearson.

Retention rates for the 2000-01 school year were calculated by comparing 2000-01 attendance records to fall 2001 enrollment records. Students who left the Texas public school system for any reason other than graduation were excluded from the total student count. Students new to Texas public school in fall 2001 were also excluded. Students who enrolled both years or graduated were included in the total student count. Students found to have been enrolled in the same grade in both years were counted as retained. Students found to have been in a higher grade in fall 2001 than in 2000-01 were counted as promoted. Students reported to have had improbable grade sequences were assigned an "unknown" promotion status. Retention rates were calculated by dividing number of students retained by total student count. Because of the criteria used, student counts in this report differ from those in other agency publications.

Retention rates have been calculated by the agency based on year-to-year progress of individual students since 1994-95. In this report, data on retention rates for Grades K-6 are reported for 1994-95 through 2000-01. Secondary school retention data are reported for 1998-99 through 2000-01 because the method of

calculating rates for Grades 7-12 was changed. Prior to the 1998-99 school year, the retention calculations included only students who were enrolled on the last Friday in October. Beginning in 1998-99, additional enrollment data for Grades 7-12 were collected for calculation of the secondary school dropout and completion rates. This collection expanded Grades 7-12 enrollment from students enrolled the last Friday in October to students enrolled at any time during the fall. The change in the retention calculation allowed more secondary school students to be included and made the calculation of the retention rate more like those of the TEA secondary school dropout rate and completion rates. Expanded enrollment data were not collected for Grades K-6, so the method of calculating enrollment counts for Grades K-6 was unchanged.

NCS Pearson provides student TAAS data to the agency for each grade level, language version, and subject. For each subject, each student received either a score or a code indicating why no score was reported. The latter included students who were absent, exempted from testing by Language Proficiency Assessment Committees (LPACs), removed from the test for illness or cheating, or assessed with the State Developed Alternative Assessment (SDAA) instead of grade-level TAAS tests. English-version reading and mathematics results were reported as Texas Learning Indices (TLIs). A TLI itself is not a percentage of items correct. Its functions are to describe how close a score is to the passing standard and to indicate progress over time. TLIs ranged from 0 to a maximum around 99. Spanish-version reading and mathematics results were reported as scale scores. Scale scores ranged from approximately 400 to approximately 2400.

Students taking the English-version test have met minimum expectations, or "passed," in reading or mathematics if they achieve TLIs of 70 or above. The same is true of students who achieved scale scores of 1500 or above on the Spanish-version tests. TLIs and scale scores were compared across years to assess progress of students who had been retained.

Some of the analyses in this report required that promotion status and TAAS performance be analyzed jointly. For these analyses, matching student records had to appear in the promotion database and in the test database. Student records in the promotion database were matched to student records in the test database based on social security number, last name, and date of birth. In cases where students had more than one record in the test database, the test records were combined and the highest scores attained were used. Records that could not be matched were excluded. In some cases, students participated in TAAS testing in spring

2001 but were not enrolled in Texas public school in fall 2001. In other cases, students enrolled after TAAS testing in spring 2001, and so had records in the promotion database but not in the testing database. In analyses using two years of TAAS data, an additional match—to the spring 2002 TAAS data files—was required. Finally, some records failed to match because of errors in reporting student identification.

In 1991, the 72nd Texas Legislature required the agency to report biennially on students retained in grade. The first report, for the 1991-92 school year, was submitted to the legislature in May 1993 (TEA, 1993). Comprehensive biennial reports to the legislature in 1993, 1995, 1997, and 1999 included sections on retention, disaggregated by grade level. In 2001, the 77th Legislature required that TEA produce an annual, rather than biennial, comprehensive report to the legislature that included information on retention (TEA, 2001c). Senate Bill 702, §9 expanded reporting on retention to include "retention and performance" (TEC §39.182, 2001). In addition, the agency has produced more detailed annual reports on retention annually since 1995 (TEA, 1995, 1996, 1997, 1998, 1999, 2001a, 2002a).

State Summary

In the 2000-01 school year, 4.7 percent of students (177,400) in kindergarten through Grade 12 were retained (Table 1). The rate was unchanged from the previous two years.

In 2000-01, the retention rate for females was 3.7 percent, and the rate for males was 5.6 percent. Males were more likely than females to be retained in each grade, ethnic group, and year. Male students made up 61.2 percent of all students retained.

Average rates for Hispanic and African American students were over twice that for White students (Figure 1). In 2000-01, 2.9 percent of White students were retained in grade, compared to 6.2 percent of Hispanic students and 6.3 percent of African American students. Although 54.3 percent of students enrolled in Texas public schools were Hispanic or African American, 72.5 percent of students retained in Texas public schools were from one of these two ethnic groups.

13

Grade-Level Retention by Grade

Elementary Grades

Across Grades K-6, the retention rate was much higher in first grade than in any other grade (Table 2). In 2000-01, the retention rate in Grade 1 remained the same as the previous year, 6.3 percent. The biggest increase for the second consecutive year was in kindergarten; the rate increased by 0.4 percentage points to 3.2 percent in 2000-01. Retention in the fifth grade (0.9%) remained the lowest across elementary grade levels.

For the most part, retention rates in Grades K-3 were rising between 1994-95 and 2000-01 (Figure 2). Retention in kindergarten has more than doubled over that period. Retention rates in Grades 4-6 have been lower than those in Grades K-3 and have not shown the same kind of increases over the seven-year period.

15

Grade-Level Retention by Grade

Secondary Grades

The highest retention rate in the secondary grades was 17.4 percent in Grade 9 in 2000-01. The lowest retention rate occurred in Grade 8 (2.1%).

Being classified in the same grade for two years was much more common in high school than in elementary school (Tables 2 and 3). Grade 9 and Grade 10 retention rates (17.4% and 8.1%, respectively) were higher than those of all elementary grades, and Grade 11 and Grade 12 retention rates (5.9% and 4.7%, respectively) were higher than those of all elementary grades except Grade 1. In high school, though, students can be classified at the same grade level for two years because one course out of six or seven was not completed successfully. In such cases, students may be able to "catch up" with their peers by making up the required course. In the elementary grades, retained students are much more likely to repeat a year's curriculum in its entirety.

ř .

Grade-Level Retention by Ethnicity

Elementary Grades

For the most part, in all elementary grades except kindergarten, Hispanic and African American students had the highest retention rates among all ethnic groups (Table 4). In first grade, 7.7 percent of Hispanic and African American students were retained, compared to 4.3 percent of White students (Figure 4). In Grades 2-6, retention rates for African American and Hispanic students were almost always more than double those for White students. Moreover, rates for African American and Hispanic students increased between 1994-95 and 2000-01 in Grades K-4.

Grade-Level Retention by Ethnicity

Secondary Grades

As in the elementary grades after kindergarten, Hispanic and African American student retention rates were substantially higher than White and Asian/Pacific Islander student retention rates (Table 5). Hispanic and African American students in Grade 9 had retention rates well over twice those of Whites and Asian/Pacific Islanders (Figure 5).

Grade-Level Retention by Gender

Elementary Grades

Males in the first grade had the highest retention rate (7.4%) among elementary-grade students (Figure 6). Fifth-grade female students had the lowest retention rate (0.7%) across elementary grades.

Figure 6

25

Grade-Level Retention by Socioeconomic Status

Elementary Grades

Across Grades K-6, students who were economically disadvantaged had higher retention rates than did students who were not economically disadvantaged (Figure 8). For both student groups, the highest retention rates across 1994-95 through 2000-01 were in first grade, with the lowest rates in fifth grade. The retention rate for kindergarten students in both groups continued to increase, up from 1.4 percent for economically disadvantaged students and 1.6 percent for students not economically disadvantaged in 1994-95 to over 3.0 percent in 2000-01 (Table 8).

2.

Grade-Level Retention by Socioeconomic Status

Secondary Grades

Across Grades 7-12, students who were economically disadvantaged had higher retention rates than did students who were not economically disadvantaged (Table 9). Regardless of socioeconomic status, the highest retention rates were in Grade 9 (Figure 9). Although Grade 9 students who were economically disadvantaged had the highest retention rate between 1998-99 and 2000-01, they also showed the greatest decrease in 2000-01 from the previous year, 1.1 percentage points.

Grade-Level Retention by Limited English Proficiency Status

Elementary Grades

Reading and language difficulties have been shown to be highly correlated with retention in the elementary grades (Kaczala, 1991; Marcon, 1993). Students with limited English proficiency (LEP) were learning English at the same time they were learning reading and other language arts skills. Depending on grade level and program availability, most LEP students were enrolled in bilingual or English as a second language (ESL) programs (TEA, 2002b). LEP students participating in special education received bilingual or ESL services as part of their special education programs. While parents could request that a child not receive special language services, in 2000-01, nearly 92 percent of LEP students participated in bilingual or ESL programs.

LEP students being served in the elementary grades had higher retention rates than students not being served for limited English proficiency (Figure 10). In 2000-01, for the first time since 1997-98, the gap in the retention rates between LEP students and other students did not increase (Table 10).

Figure 10

Grade-Level Retentionby Limited English Proficiency Status

Secondary Grades

In the secondary grades, the retention rate for LEP students decreased for a second year between 1998-99 and 2000-01, and the gap in retention rates between students who were limited English proficient and students who were not continued to narrow (Figure 11).

Nearly 82 percent of LEP students in secondary school were served in ESL programs. The retention rate for secondary school ESL students in 2000-01 was 12.9 percent (Table 11).

Grade-Level Retention by Special Education Status

Elementary Grades

Each student in a special education program had an individualized education program that specified goals and objectives for the year. The student progressed to the next grade level whenever these goals were met. It is important to note that retention and promotion policies and practices for students with disabling conditions varied across districts.

The average retention rate for students who participated in special education programs was compared to the average rate for students who did not (Figure 12). Students receiving special education services at the elementary level consistently had higher retention rates than those not receiving special education services. First-grade students receiving special education services had the highest retention rate (10.2%), followed by kindergarten students receiving special education services (9.6%). The retention rate for kindergarten students receiving special education services was nearly four times that of kindergarteners not receiving special education services (2.6%). In grades above kindergarten, this differential dropped considerably (Table 12).

Grade-Level Retention by Special Education Status

Secondary Grades

As in the elementary grades, students receiving special education services had higher retention rates than other students at the secondary level (Table 13). The retention rate for students receiving special education services was highest in ninth grade (23.0%), as was the rate for students not receiving special education services (16.5%) (Figure 13). In Grade 12, students receiving special education services were repeating the grade at nearly three times the rate of students not receiving special education services, possibly because funding was available to provide special education services to students through the age of 21.

Retention and Student Performance

Texas Assessment of Academic Skills (TAAS) Scores

TAAS Passing Rates

TAAS Scores

In 2001, the 77th Texas Legislature required the Texas Education Agency (TEA) to begin reporting the performance of retained students (Texas Education Code [TEC] §39.182, 2001). Average spring 2001 TAAS scores of students in Grades 3-8 repeating a grade in 2001-02 were compared to average spring 2002 TAAS scores. Percentages passing were also calculated. Average scores and passing rates were calculated separately for reading and mathematics, for each grade level, and for Spanish- and English-language versions of the test. Texas Learning Index (TLI) scores were averaged for English-language tests and scale scores were averaged for Spanish-language tests. For comparison purposes, the 2001 TAAS results for promoted students were also calculated.

Of students in Grades 3-8 who took the English-version mathematics TAAS in spring 2001 and were subsequently promoted, average TLI scores ranged from 80.3 in Grade 3 to 84.7 in Grade 5 (Table 14). Of students who were subsequently retained, average TLIs ranged from 60.4 in Grade 3 to 70.9 in Grade 8. Retained students' average mathematics TLI scores were 12.1 points to 19.9 points lower than the scores of their promoted counterparts. After a second year in the same grade, the average scores of students who had been retained showed increases of 5.7 to 17.1 points, but still failed to reach those of students who had been promoted. Of students repeating Grades 3-8 who took the English-version mathematics TAAS in spring 2002, average TLIs ranged from 76.4 in Grade 7 to 80.8 in Grade 5.

Results on the English-version reading TAAS were similar (Figure 14). Average TLIs of students who were retained were below 72 in spring 2001. In spring 2002, increases in the average TLI scores of students who were retained ranged from 7.0 to 16.2 points, and the average TLIs were between 76 and 81. The average TLIs of students who were promoted were above 83.

Spanish-version TAAS results were similar in that the performance of students who would be retained was significantly lower than the performance of students who would be promoted. Also, the test scores of retained students showed gains in the second year. The performance of students after retention, relative to the performance of promoted students, was more variable. There were cases (Grades 3, 4, and 5 mathematics; Grade 6 reading) where the second-year scores of retained students surpassed those of their previously promoted counterparts.

TAAS Passing Rates

In Grades 3-8, promoted students had passing rates of 83 percent or better on the 2001 English-version reading and mathematics TAAS tests (Table 15). Again, students who were retained had much lower passing rates than students who were promoted. On the first attempt, fewer than 61 percent of retained students in a grade level passed TAAS mathematics or reading. A year later, on the 2002 English-version TAAS, the performance of retained students improved, but the percentages passing were quite variable, depending on subject and grade level. For example, passing rates for retained students ranged from 67.7 percent in Grade 6 reading to 87.8 percent in Grade 5 mathematics.

The passing percentages of students in Grades 3-6 who were assessed by the Spanish-version TAAS in spring 2001 and were retained at the end of the year were quite low—ranging from a low of 5.6 percent passing in Grade 5 reading to a high of 54.0 percent passing in Grade 4 mathematics. The passing percentages of promoted students ranged from a low of 49.1 percent in Grade 6 reading to a high of 90.7 percent in Grade 4 mathematics. The percentages of retained students passing reading and mathematics increased by at least 40 percentage points in Grades 3, 4, and 5. Performance gains were lower in Grade 6.

Grade 8

Student Performance and Promotion

Beginning in 2003, students in Grade 3 must demonstrate mastery of grade-level skills on a state reading assessment (Texas Education Code [TEC] §28.0211, 2001). Students who fail to meet the standard must be provided accelerated instruction and be given a second opportunity to pass the test. The statute requires retention of a student who fails to meet standards after three opportunities unless the members of his or her grade placement committee unanimously recommend advancement to Grade 4. Similar requirements for Grade 5 and Grade 8 reading and mathematics take effect in 2004-05 and 2007-08, respectively.

Performance of Texas students on the Texas Assessment of Academic Skills (TAAS) has improved steadily over the past decade as students, school districts, and communities have risen to the challenges of higher standards. Many local school systems have already begun preparing for the new, more stringent requirements by intensifying efforts to identify students at risk of failure and provide them instructional support. These local efforts have been supported by state initiatives in reading and mathematics.

To facilitate school district and state planning and to monitor the effects of the policies and related programs as they are phased in, the agency prepared a series of tables on TAAS performance and retention. Students were grouped by TAAS performance in spring 2001. Students in Grade 3 were grouped according to whether they passed or failed the reading TAAS test. Students in Grades 4-8 were grouped according to whether they passed or failed the reading and mathematics TAAS tests. Within each group, the numbers and percentages of students who were promoted and retained in 2000-01 were calculated.

The analyses have been prepared for planning and monitoring purposes and are not intended to be projections. There are several reasons assessment and promotion results in 2003 will differ from those in 2001. When the provisions of the new legislation are in place, students in Grades 3, 5, or 8 who fail the required assessment or assessments in the first attempt will be eligible for accelerated instruction and two additional testing opportunities. Grade placement committees will make the final decisions on grade advancements and instruction. In addition, in spring 2003, the new Texas Assessment of Knowledge and Skills (TAKS) along with new passing standards will be introduced. The effects of the new assessment program on student passing rates are as yet unknown. Finally, many of the students in Grade 3 in 2003 will have been beneficiaries of the reading programs for students in Grades K-2 funded by Student Success Initiative funds authorized in 1999.

Grade 3-8 Summary

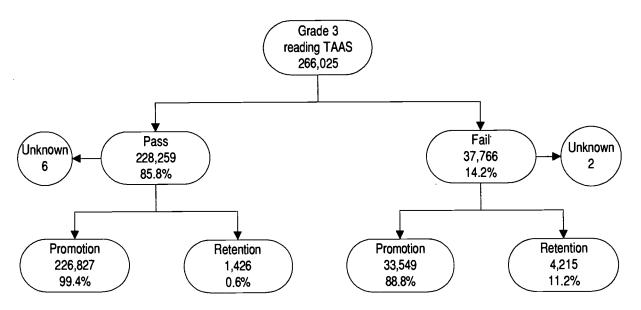

In the 2000-01 school year, 37,766 students in the third grade did not pass the reading TAAS with one testing opportunity (Table 16). Just over 11 percent of the students (4,215) who failed the reading TAAS in spring 2001 were retained after the 2000-01 school year. In fifth and eighth grades, 32,634 and 30,323 students, respectively, would have qualified for accelerated instruction and retesting based on spring 2001 TAAS results. Of these students, 3.5 percent were retained in Grade 5 and 6.0 percent were retained in Grade 8 in 2000-01.

Appendix A Law and Rules

Texas Education Code §28.021 and §28.0211

Commissioner's Rules Concerning the Student Success Initiative

Texas Education Code §28.021 and §28.0211

§28.021. Student Advancement.

- (a) A student may be promoted only on the basis of academic achievement or demonstrated proficiency of the subject matter of the course or grade level.
- (b) In measuring the academic achievement or proficiency of a student who is dyslexic, the student's potential for achievement or proficiency in the area must be considered.

Added by Acts 1995, 74th Leg., ch. 260, §1, eff. May 30, 1995.

§28.0211. Satisfactory Performance on Assessment Instruments Required; Accelerated Instruction.

- (a) Except as provided by Subsection (b) or (e), a student may not be promoted to:
 - the fourth grade program to which the student would otherwise be assigned if the student does not perform satisfactorily on the third grade reading assessment instrument under Section 39.023;
 - the sixth grade program to which the student would otherwise be assigned if the student does not perform satisfactorily on the fifth grade mathematics and reading assessment instruments under Section 39.023; or
 - (3) the ninth grade program to which the student would otherwise be assigned if the student does not perform satisfactorily on the eighth grade mathematics and reading assessment instruments under Section 39.023.
- (b) A school district shall provide to a student who initially fails to perform satisfactorily on an assessment instrument specified under Subsection (a) at least two additional opportunities to take the assessment instrument. A school district may administer an alternate assessment instrument to a student who has failed an assessment instrument specified under Subsection (a) on the previous two opportunities. Notwithstanding any other provision of this section, a student may be promoted if the student performs at grade level on an alternate assessment instrument under this subsection that is appropriate for the student's grade level and approved by the commissioner.
- (c) Each time a student fails to perform satisfactorily on an assessment instrument specified under Subsection (a), the school district in which the student attends school shall provide to the student accelerated instruction in the applicable subject area, including reading instruction for a student who fails to perform satisfactorily on a reading assessment instrument. After a student fails to perform satisfactorily on an assessment instrument a second time, a grade placement committee shall be established to prescribe the accelerated instruction the district shall provide to the student before the student is administered the assessment instrument the third time. The grade placement committee shall be composed of the principal or the principal's designee, the student's parent or guardian, and the teacher of the subject of an assessment instrument on which the student failed to perform satisfactorily. The district shall notify the parent or guardian of the time and place for convening the grade placement committee and the purpose of the committee. An accelerated instruction group administered by a school district under this section may not have a ratio of more than 10 students for each teacher.
- (d) In addition to providing accelerated instruction to a student under Subsection (c), the district shall notify the student's parent or guardian of:
 - (1) the student's failure to perform satisfactorily on the assessment instrument;
 - (2) the accelerated instruction program to which the student is assigned; and
 - (3) the possibility that the student might be retained at the same grade level for the next school year.

- (e) A student who, after at least three attempts, fails to perform satisfactorily on an assessment instrument specified under Subsection (a) shall be retained at the same grade level for the next school year in accordance with Subsection (a). The student's parent or guardian may appeal the student's retention by submitting a request to the grade placement committee established under Subsection (c). The school district shall give the parent or guardian written notice of the opportunity to appeal. The grade placement committee may decide in favor of a student's promotion only if the committee concludes, using standards adopted by the board of trustees, that if promoted and given accelerated instruction, the student is likely to perform at grade level. A student may not be promoted on the basis of the grade placement committee's decision unless that decision is unanimous. The commissioner by rule shall establish a time line for making the placement determination. This subsection does not create a property interest in promotion. The decision of the grade placement committee is final and may not be appealed.
- A school district shall provide to a student who, after three attempts, has failed to perform satisfactorily on an assessment instrument specified under Subsection (a) accelerated instruction during the next school year as prescribed by an educational plan developed for the student by the student's grade placement committee established under Subsection (c). The district shall provide that accelerated instruction regardless of whether the student has been promoted or retained. The educational plan must be designed to enable the student to perform at the appropriate grade level by the conclusion of the school year. During the school year, the student shall be monitored to ensure that the student is progressing in accordance with the plan. The district shall administer to the student the assessment instrument for the grade level in which the student is placed at the time the district regularly administers the assessment instruments for that school year.
- (g) This section does not preclude the retention at a grade level, in accordance with state law or school district policy, of a student who performs satisfactorily on an assessment instrument specified under Subsection (a).
- (h) In each instance under this section in which a school district is specifically required to provide notice to a parent or guardian of a student, the district shall make a good faith effort to ensure that such notice is provided either in person or by regular mail and that the notice is clear and easy to understand and is written in English or the parent or guardian's native language.
- (i) The admission, review, and dismissal committee of a student who participates in a district's special education program under Subchapter B, Chapter 29, and who does not perform satisfactorily on an assessment instrument specified under Subsection (a) and administered under Section 39.023(a) or (b) shall determine:
 - (1) the manner in which the student will participate in an accelerated instruction program under this section; and
 - (2) whether the student will be promoted or retained under this section.
- (j) A school district or open-enrollment charter school shall provide students required to attend accelerated programs under this section with transportation to those programs if the programs occur outside of regular school hours.
- (k) The commissioner shall adopt rules as necessary to implement this section, including rules concerning when school districts shall administer assessment instruments required under this section and which administration of the assessment instruments will be used for purposes of Section 39.051.
- (l) The commissioner shall issue a report to the legislature not later than December 1, 2000, that reviews the enrollment of students in accelerated instruction and the quality and availability of accelerated instruction programs, including accelerated instruction-related teacher professional development programs.

(m) The commissioner shall certify, not later than July 1 of each school year or as soon as practicable thereafter, whether sufficient funds have been appropriated statewide for the purposes of this section. A determination by the commissioner is final and may not be appealed. For purposes of certification, the commissioner may not consider Foundation School Program funds. This section may be implemented only if the commissioner certifies that sufficient funds have been appropriated during a school year for administering the accelerated instruction programs specified under this section.

Text of subsection (n) effective until January 1, 2008

- (n) This section applies to the assessment instrument administered to students in:
 - (1) the third grade beginning with the 2002–2003 school year;
 - (2) the fifth grade beginning with the 2004–2005 school year; and
 - (3) the eighth grade beginning with the 2007–2008 school year.

Text of subsection (o) effective until January 1, 2008

(o) Subsection (n) and this subsection expire January 1, 2008.

Added by Acts 1999, 76th Leg., ch. 396, §2.12, eff. Sept. 1, 1999.

Commissioner's Rules Concerning the Student Success Initiative

Statutory Authority: The provisions of this Subchapter BB issued under the Texas Education Code, §28.0211, unless otherwise noted.

§101.2001. Policy.

- (a) The policy of the Texas Education Agency relating to the grade advancement testing requirements, as specified in the Texas Education Code (TEC), §28.0211(a), is to support student academic achievement of the essential knowledge and skills at each grade level to enable a student to succeed at the next grade level.
- (b) In addition to local policy relating to grade advancement, students in Grades 3, 5, and 8 shall demonstrate proficiency in the subjects required by TEC, §28.0211(a), in order to advance to the next grade. Demonstrated proficiency is defined under this section as meeting the passing standard on the appropriate assessment instruments specified by §101.2003(a) of this title (relating to Grade Advancement Testing Requirements) or on a state-approved alternate assessment authorized in §101.2011 of this title (relating to Alternate Assessment). A student who does not demonstrate proficiency as described in this section may only advance to the next grade if the student's Grade Placement Committee, as specified in §101.2007 of this title (relating to Role of Grade Placement Committee), determines by unanimous decision, in accordance with the standards for promotion established by the local school board, that the student is likely to perform at grade level at the end of the next year given additional accelerated instruction.
- (c) The purpose of these rules is to ensure the effective implementation of the grade advancement testing requirements as part of an overall system of support for student academic achievement. This system includes but is not limited to the following:
 - (1) informal and formal assessment of student needs at preceding grades and corresponding early intervention activities that address those needs;
 - (2) continuous and ongoing evaluation by a variety of means;
 - (3) research-based instructional programs;
 - (4) targeted accelerated instruction informed by multiple testing opportunities and other means of evaluation;
 - a grade placement committee which decides on an individual student basis the most effective way to support a student's academic achievement on grade level; and
 - (6) accelerated education plans for every student who does not pass the required grade advancement assessments after three opportunities, whether he or she is retained or promoted by his or her grade promotion committee.

Source: The provisions of this §101.2001 adopted to be effective May 26, 2002, 27 TexReg 4337.

§101.2003. Grade Advancement Testing Requirements.

- Each school district and charter school shall test eligible students in accordance with the grade advancement requirements for the grades and subjects specified in the Texas Education Code (TEC), §28.0211(a). These requirements pertain to the following assessment instruments under TEC, §39.023(a), (b), and (l):
 - (1) the reading test at Grade 3, beginning in the 2002-2003 school year;
 - (2) the reading and mathematics tests at Grade 5, beginning in the 2004-2005 school year; and
 - the reading and mathematics tests at Grade 8, beginning in the 2007-2008 school year.
- (b) These requirements apply to any eligible student who is enrolled in a local school district or charter school at the time of testing as established in the assessment calendar by the commissioner of education.

- (c) A student receiving special education services under the TEC, Chapter 29, Subchapter A, enrolled in Grades 3, 5, or 8 and who is receiving instruction on grade level in the essential knowledge and skills in a subject specified under subsection (a) of this section is eligible under this section. In accordance with \$101.5(b) of this title (relating to Student Testing Requirements) and TEC, \$28.0211(i), the student's admission, review, and dismissal (ARD) committee shall determine appropriate assessment and acceleration options for each eligible student. Assessment decisions must be made on an individual basis and in accordance with administrative procedure established by the Texas Education Agency (TEA). These decisions shall be documented in the student's individualized education program (IEP).
- (d) A limited English proficient (LEP) student, as defined by the TEC, Chapter 29, Subchapter B, who is administered an assessment in English or Spanish for a grade and subject specified in subsection (a) of this section is eligible under this section. In accordance with §101.1003 of this title (relating to Role of the Language Proficiency Assessment Committee), the student's language proficiency assessment committee (LPAC) shall determine appropriate assessment and acceleration options for each eligible student. The grade placement committee, as specified in §101.1007 of this title (relating to Limited English Proficient Students at Grades Other Than Exit Level), shall make its decisions in consultation with a member of the student's LPAC. Assessment decisions must be made on an individual basis and in accordance with administrative procedure established by the TEA.
- (e) As specified in §101.1009 of this title (relating to Limited English Proficient Students Who Receive Special Education Services), decisions regarding assessments for LEP students who receive special education services shall be made by the ARD committee, which includes a member of the LPAC to ensure that issues related to the student's language proficiency are duly considered.
- (f) In accordance with TEC, §28.021(b), decisions regarding a student who is dyslexic and eligible under this section shall consider the student's potential for achievement or proficiency in the tested subject.
- (g) A school district or charter school must determine a student's previous testing history and, if applicable, the accelerated instructional program he or she has received.

Source: The provisions of this \$101.2003 adopted to be effective May 26, 2002, 27 TexReg 4337.

§101.2005. Test Administration and Schedule.

- (a) The Texas Education Agency (TEA) shall establish the test administration procedures in the applicable test administration materials. The superintendent of each school district and chief administrative officer of each charter school shall be responsible for following these procedures and maintaining the integrity of the test administration and the security and confidentiality requirements, as specified in Chapter 101, Subchapter C, of this title (relating to Security and Confidentiality).
- (b) The TEA shall provide three opportunities per year for the tests required for grade advancement as specified in the Texas Education Code, §28.0211(a). The commissioner of education shall specify the dates of these administrations in the assessment calendar. Additional test opportunities will not be provided.
- (c) The superintendent of each school district and chief administrative officer of each charter school shall establish procedures to ensure:
 - (1) that each eligible student who is absent or does not receive a test score for any test administration shall receive appropriate accelerated instruction as warranted on an individual student basis; and
 - that each eligible student who is absent or does not receive a test score for all three test opportunities and is consequently retained shall receive other appropriate means of evaluation, including the administration of an alternate assessment, as provided under §101.2011(a) of this

title (relating to Alternate Assessment), so that the grade placement committee has sufficient evidence for its review upon appeal by a parent or guardian.

Source: The provisions of this §101.2005 adopted to be effective May 26, 2002, 27 TexReg 4337.

§101.2007. Role of Grade Placement Committee.

- (a) In accordance with the Texas Education Code (TEC), §28.0211, the superintendent of each school district and chief administrative officer of each charter school shall establish procedures for convening a grade placement committee (GPC) for each student who fails to demonstrate proficiency on the second administration of the test required for grade advancement. Decisions by the GPC shall be made on an individual student basis to ensure the most effective way to support the student's academic achievement on grade level.
- (b) The GPC shall be composed of the principal or principal's designee, the student's parent or guardian, and the student's teacher(s) of the subject of the grade advancement(s) test on which the student has failed to demonstrate proficiency. If this teacher is unavailable, the principal shall designate a certified professional educator who is most familiar with the student in the subject area to serve on the GPC. If more than one parent or guardian has the authority to make educational decisions regarding the student, a good faith effort must be made to notify both parents, but participation of any one parent or guardian is sufficient. Either parent or only one guardian may initiate an appeal. If both parents or guardians serve on the GPC but do not agree, either may agree to promote the student (if the remaining members of the GPC also agree to the promotion). The district may accept a parent's or guardian's written designation of another individual to serve on the GPC for all purposes. The district may accept a parent's or guardian's written and signed waiver of participation in the GPC and designation of the remaining members of the GPC as the decision-making entity for all purposes.
 - (1) If a parent or guardian or designee is unable to attend a meeting, the district may use other methods to ensure parent participation, including individual and conference telephone calls. The district may designate an individual to act on behalf of the student in place of a parent, guardian, or designee if no such person can be located. A surrogate parent named to act on behalf of a student with a disability shall be considered a parent for purposes of TEC, §28.0211.
 - The district shall make a good faith effort to notify a parent or guardian to attend the GPC. If a parent or guardian is unavailable, the remaining members of the GPC must convene as required by this section and take any actions required, except that the GPC may not agree to promote a student under TEC, §28.0211(e), unless a parent, guardian, or designee has appealed. A district may allow an appeal to be filed in writing in lieu of attending the GPC.
- (c) Within five working days of receipt of student test results for the second administration of the test required for grade advancement, the district shall notify (for each student who fails to demonstrate proficiency) the campus principal of student test results. Upon receipt of this notice, the principal shall notify the teacher and parent or guardian of the test results. This notice shall include a description of the purpose and responsibilities of the GPC and the time and place for the GPC to hold its first meeting.
- (d) The GPC is responsible for prescribing the accelerated instruction the student is to receive before the third testing opportunity. The GPC shall also decide at this time whether the student shall take the assessment specified in §101.2003 of this title (relating to Grade Advancement Testing Requirements) or the alternate assessment, as authorized by §101.2011 of this title (relating to Alternate Assessment). In the absence of unanimous agreement, the student shall take the assessment specified in §101.2003.
- (e) The GPC must convene again if a student fails to demonstrate proficiency on the third administration of a test required for grade advancement and is thereby automatically retained at the same grade level. Within five working days of receipt of student test results for this administration, the district shall notify (for each

69

student who fails to demonstrate proficiency) the principal or principal's designee of student test results. Upon receipt of this notice from the district, the principal shall inform the teacher and parent or guardian of the time and place for the GPC to hold a meeting. This notice shall inform the parent or guardian of the opportunity to appeal the automatic retention of the student. The district shall establish a procedure to ensure a good faith effort is made toward securing the parent's or guardian's receipt of the retention notification. The parent or guardian may appeal the retention by submitting a request to the GPC within five working days of receipt of this retention notification.

- (f) If an appeal has been initiated by the parent or guardian, the GPC may decide in favor of promotion only if the GPC concludes, upon review of all facts and circumstances and in accordance with standards adopted by the local school board, that the student is likely to perform on grade level given additional accelerated instruction during the next school year. A student may be promoted only if the GPC's decision is unanimous. The review and final decision of the GPC must be appropriately documented as meeting the standards adopted by the local school board. These standards may include but are not limited to the following:
 - (1) evidence of satisfactory student performance, including grades, portfolios, work samples, local assessments, and individual reading and mathematics diagnostic tests or inventories;
 - (2) improvement in student test performance over the three testing opportunities; and
 - (3) extenuating circumstances that have adversely affected the student's participation in either the required assessments or accelerated instruction.
- In accordance with TEC, §28.0211(e), the placement decision by the GPC shall be made before the start of the next school year or, if applicable, upon reenrollment of a student after this date.
- (h) A student who has been promoted upon completion of a school year in a school other than a Texas public school may be enrolled in that grade without regard to whether the student has successfully completed an assessment required under TEC, §28.0211. This subsection does not limit the authority of a district to appropriately place a student under TEC, Chapter 25, Subchapter B.
- (i) In addition to the placement decision, the GPC shall develop an accelerated educational plan for each student who does not pass after three testing opportunities, regardless of whether the student has been promoted or retained. This plan shall include the accelerated instruction that the district must provide during the next school year. The plan must be designed to enable the student to perform at the appropriate grade level by the end of the next school year. The district shall establish a policy for monitoring the student during the school year to ensure that the student is progressing in accordance with the plan. The accelerated education plan must provide for interim progress reports to the student's parent or guardian and the opportunity for consultation with the teacher and/or principal as needed.

§101.2009. Notice to Parents or Guardians.

- (a) As specified in §101.9 of this title (relating to Grade Advancement Requirements), the superintendent of each school district or chief administrative officer of each charter school shall notify parents or guardians of the grade advancement requirements.
- (b) The district shall provide early notice to parents or guardians of students identified in a preceding grade to be at risk of failure on the first administration of the test required for grade advancement the next year. The superintendent must establish the instruments/procedures to be used to make this determination. In the case of second grade students, it must include the results of the reading inventory required under Texas Education Code, §28.006. This notice shall be provided before the end of the school year preceding the grade advancement requirements.

- (c) The district shall establish procedures to notify the parent or guardian of a student who has failed to demonstrate proficiency on the first administration of a grade advancement test. This notification should be made within five working days of district receipt of student test results from this administration. This notice shall include the student's test results, description of the grade advancement policy, the accelerated instruction to which the student has been assigned, and the possibility that the student might be retained at the same grade level for the next school year. In addition, the notice shall encourage parents or guardians to meet immediately with the student's teacher to outline mutual responsibilities to support the student during accelerated instruction.
- (d) Whenever the district is required to notify a parent or guardian about the requirements related to promotion and accelerated instruction for students at risk of retention, including the notification requirements for the grade placement committee under §101.2007 of this title (relating to Role of the Grade Placement Committee), the district shall make a good faith effort to ensure that the notice is provided either in person or by regular mail, is clear and easy to understand, and is written in English or in the parent's or guardian's native language.

Source: The provisions of this §101.2009 adopted to be effective May 26, 2002, 27 TexReg 4337.

§101.2011. Alternate Assessment.

- (a) On the third testing opportunity, each school district and charter school may establish by local board policy a district-wide procedure to use a state-approved alternate assessment instead of the statewide assessment instrument specified in §101.2003(a) of this title (relating to Grade Advancement Testing Requirements). The commissioner of education shall provide annually, to school districts and charter schools, a list of state-approved group-administered achievement tests certified by test publishers as meeting the requirements of Texas Education Code, §28.0211. This list shall include nationally recognized instruments for obtaining valid and reliable data, which demonstrate student competencies in the applicable subject at the appropriate grade level range. The district shall select only one test for each applicable grade and subject to be used under this section.
- (b) The alternate assessment must be given during the period established in the assessment calendar by the commissioner of education to coincide with the date of the third administration of the statewide assessment.
- (c) A company or organization scoring a test defined in subsection (a) of this section shall send test results to the school district for verification within ten working days following receipt of the test materials from the school district.
- (d) To maintain the security and confidential integrity of group-administered achievement tests, school districts and charter schools shall follow the procedures for test security and confidentiality delineated in Chapter 101, Subchapter C, of this title (relating to Security and Confidentiality).

Source: The provisions of this §101.2011 adopted to be effective May 26, 2002, 27 TexReg 4337.

§101.2013. Accelerated Instruction.

- (a) Each time a student fails to demonstrate proficiency on an assessment required for grade advancement, the school district or charter school shall provide the student with accelerated instruction in the applicable subject. Accelerated instruction should be consistent with previous diagnostic testing and intervention activities, if any, the student has received. Group-administered accelerated instruction may not have a ratio of more than ten students to each teacher.
- (b) Accelerated instruction required after the first and second testing opportunities should be designed to address student needs to the greatest extent possible before the next respective testing opportunity.

- (c) Each school district and each charter school shall be responsible for providing transportation to students required to attend acceleration programs if these programs occur outside of regular school hours.
- (d) Accelerated instruction shall be based on but not limited to the following:
 - (1) assessment of specific student needs, which may include as appropriate the following: teacher observations and evaluations; academic progress reports; previous identification of student needs and corresponding interventions; and performance on previous assessment instruments in the applicable subject.
 - (2) best instructional practices identified through research that the district may obtain and implement through technical assistance from the Texas Education Agency and education service centers.

Source: The provisions of this §101.2013 adopted to be effective May 26, 2002, 27 TexReg 4337.

§101.2015. Parental Waiver.

The superintendent of each school district and chief administrative officer of each charter school shall establish a waiver process by which a parent or guardian may request that a student not participate in the third test opportunity due to potential harm to the student. The waiver must provide documentation of potential harm, student need, and other appropriate information. If a parental waiver is granted, the student must still participate in all required acceleration and is subject to retention based on the failure on the second test administration.

Source: The provisions of this \$101.2015 adopted to be effective May 26, 2002, 27 TexReg 4337.

§101.2017. Scoring and Reporting.

- In accordance with §101.81 of this title (relating to Scoring and Reporting), the scoring contractor will provide school districts with the results of the assessments required by the Texas Education Code, §28.0211, or, if applicable, the results of the alternate assessment specified in §101.2011 of this title (relating to Alternate Assessment), within ten working days following the receipt of the test materials from the school district or charter school.
- (b) As specified by Texas Education Code (TEC), §39.051(b)(7), the superintendent of each school district and chief administrative officer of each charter school shall report the following information to the Texas Education Agency:
 - the percentage of students, aggregated by grade level, provided accelerated instruction under TEC, §28.0211(c);
 - (2) the results of assessments administered under TEC, §28.0211(c);
 - the percentage of students promoted through the grade placement committee process under TEC, §28.0211; and
 - (4) the subject of the assessment instrument on which each student failed to perform satisfactorily, and the performance of those students in the school year following that promotion on the assessment instruments required under TEC, §39.023.

Source: The provisions of this §101.2017 adopted to be effective May 26, 2002, 27 TexReg 4337.

§101.2019. Credit for High School Graduation.

(a) Students who have been retained in Grade 8 in accordance with the grade advancement testing requirements may earn course credit for high school graduation during the next school year in subject areas other than the required courses in the subject area which caused the student to be retained.

80

(b) The school board of each district and each charter school may establish a policy that provides for the placement of retained students in an age-appropriate learning environment. In accordance with local grade configurations for elementary, middle, and high school campuses, this policy may specify the age by which a retained student should be placed on the next level campus even though not yet promoted to the grade of that campus.

Grade-Level Retention in Texas Public Schools, 2000-01

Notes on Appendix B

All Students

A cumulative total of students served in a district, during the school year. Students who dropped or migrated out of the Texas public school system after the first year were exclude from the total student count, as were students new to the system in the second year. Students who enrolled both years or graduated were included in the total student count.

Average Teacher Experience

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. Weighted averages are obtained by multiplying each teacher's FTE count by years of experience. These amounts, when summed for all teachers within a district and divided by the total teacher FTE count within that respective district, result in the average years of teacher experience.

Average Teacher Salary

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. Average teacher salary is calculated as the total salary of teachers divided by the total FTE count of teachers. The total salary amount is for regular duties only and does not include pay for any supplemental duties.

CEI Level, see Cost of Education Index.

Cost of Education Index

The Cost of Education Index (CEI) reflects geographic variations in costs beyond the control of school districts. The index currently in use was first implemented in 1991-92. The CEI has a minimum value of 1.0 and a maximum of 1.20. This category divides districts into five groups with approximately equal numbers of districts in each.

Density, see Student Density.

District Type

Districts are classified on a scale ranging from major urban to rural. The charter school districts are in a separate subcategory. Factors such as size, growth rates, student economic status, and proximity to urban areas are used to determine the appropriate group. The groups are:

Major Urban. The largest school districts in the state that serve the six metropolitan areas of Houston, Dallas, San Antonio, Fort Worth, Austin, and El Paso. A district is designated major urban if it is the largest in counties with populations of 650,000 or over, and there is greater than 35% low-income students in the school district. Or, if not the largest district in the county, the number of students in membership is 75% of the largest district and there are more than 35% low-income students in the district.

Major Suburban. Other school districts in and around the major urban areas. A district is major suburban if it is contiguous to a major urban district and the number of students in membership is at least 3% of the major urban district or an enrollment of at least 4,500. If a district is not contiguous to a major urban area, then it must be within the same county and have an enrollment of 15% of the major urban district or an enrollment of at least 4,500 in order to be classified as major suburban.

Other Central City. The major school districts in other large Texas cities. If the district is not contiguous to one of the major urban districts but the county population is between 100,000 and 650,000 and it is the largest district in the county or its population is 75% of the largest district then the district is designated as other central city.

Other Central City Suburban. Other school districts in and around the other large, but not major, Texas cities. If the district is in a county between 100,000 and 650,000 population and the number of students in membership is at least 15% of the largest district in the county then it is designated central city suburban. If a district is contiguous to a central city district, its population is greater than 3% of that district's, and the number of students in membership is greater than the corresponding median figure for the state, it is also central city suburban.

Independent Town. If the district is the largest in a county having a population of 25,000 to 100,000, or the number of students in membership is greater than 75% of the largest district, the district is considered an independent town.

Non-Metro: Fast Growing. The school districts that fail to be in any of the above subcategories and that exhibit a five-year growth rate of at least 20 percent.

These districts must have at least 300 students in membership.

Non-Metro: Stable. The school districts that fail to be in any of the above subcategories, yet the number of students in membership exceeds the state median of 726.

Rural. The school districts that fail all of the above tests for placement into a subcategory. These districts either have a growth rate less than 20 percent and the number of students in membership is between 300 and the state median of 726, or the number of students in membership is less than 300.

Charter Schools. The 159 open-enrollment schools granted a charter by the State Board of Education for operation during 2000-2001. Open-enrollment charter schools operate in a facility of a commercial or nonprofit entity or a school district.

ESC Region, see **Education Service Center Regions**.

Economically Disadvantaged

The number of students eligible for free or reducedprice lunch or eligible for other public assistance as defined in the 2001-2002 Public Education Information Management System Data Standards (TEA, 2001d) is used as a proxy for the number of economically disadvantaged students. Eligibility for free or reduced price lunch or other public assistance is reported for each student at the time of enrollment. (See also Percent Economically Disadvantaged Students.)

Education Service Center Regions

The state is divided into 20 geographic regions, each served by an Education Service Center (ESC). The ESC region reflected in this category is the region from which the district receives services, not the geographically assigned ESC region. For the vast majority of districts, these are the same.

Enrollment

Districts are grouped by size into nine subcategories based on their number of students in membership. This is the total number of students in membership in the district on a day in late October of each year. It does not include students who are served by the

district but are not in membership in the serving district.

Enrollment Groupings, see Enrollment.

Highest Property Value Category

Currently, the Comptroller's Property Tax Division (CPTD) classifies property into multiple subcategories based on how the property is used. These subcategories are aggregated into four classifications as follows:

Residential. Single-family and multi-family residential, and residential inventory

Land. Vacant lots, and rural real (taxable)

Oil and Gas. Oil, gas, and minerals

Business. Commercial and industrial real, commercial and industrial personal, and utilities

The one subcategory of these four which has the greatest total property value for a district determines in which category the district is placed. The six special statutory and 159 charter school districts form a separate group because they have no taxable property wealth.

Loc. Adopt Tax Rate, see Locally Adopted Tax Rates.

Local M&O Tax Rate, see **Local Maintenance and Operations Tax Rates**.

Locally Adopted Tax Rates

Districts are grouped into four tax effort subcategories, or quartiles, with approximately equal numbers of districts in each. This category shows the total adopted tax rate, as reported by the CPTD office. The six special statutory and 159 charter school districts are in a separate subcategory because they do not levy property taxes.

Local Maintenance and Operations Tax Rates

Districts are grouped into four tax effort subcategories, or quartiles, with approximately equal numbers of districts in each. This category shows the maintenance and operation (M&O) adopted tax rate, as reported by the CPTD office. The M&O levy includes money generated by districts for equalizing

wealth. The six special statutory and 159 charter school districts form a separate group in both categories because they do not levy property taxes.

Number Retained

To determine the number of students retained in grade, fall enrollment data were compared to attendance in the final, six-week period of the previous school year. Students enrolled in the same grade in both years were counted as retained.

Operating Cost Per Student

Operating costs are the sum of all expenditures budgeted for the operation of the district, for all funds which are reported. The operating expenditures are a subset of the total expenditures; they do not include debt service, capital outlay, or ancillary services expenditures. Per student amounts are the current school year expenditures divided by the current number of students. Districts are grouped into five subcategories with approximately equal numbers of districts in each. The source for budgeted expenditures is the fall submission of the Public Education Information Management System (PEIMS).

Percent African American, Hispanic, and Minority Students

In these categories, districts are grouped according to the ethnic composition of their student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percent of the total. The non-white populations include Native American or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic. Each of the three categories has six subgroups with the particular population ranging from "under 5%" to "50 percent and over."

Percent Economically Disadvantaged (Low Income) Students

Percent low income is the number of students reported as economically disadvantaged on PEIMS, expressed as a percent of the total number of students. Districts report students as economically disadvantaged if they meet any of the following conditions:

 a. eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;

- b. from a family with an annual income at or below the federal poverty line;
- c. eligible for AFDC or other public assistance;
- d. recipients of a Pell Grant or comparable state program of need-based financial assistance;
- e. eligible for programs assisted under Title II of the Job Training Partnership Act.

Districts are grouped into six subgroups ranging from "under 20%" to "80% and over."

Percent Minority Teachers

In this category, districts are grouped according to the minority composition of their teacher populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white teacher FTEs expressed as a percent of total teacher FTEs. The category has six groupings with the minority population ranging from "under 5%" to "50% and over."

Percent of Teachers with Advanced Degrees

In this category, districts are grouped into four subcategories with approximately equal numbers of districts in each. The percent of teachers with an advanced degree is calculated as the FTE count of teachers with a master's degree or doctorate divided by the FTE count for all teachers.

Property Wealth

Wealth is defined as total taxable property value divided by the total number of students and is used as an indicator of a district's ability to raise local funds on a per pupil basis. The property value used is total taxable value for the last completed calendar year, i.e. 2001, as determined by the Comptroller's Property Tax Division (CPTD). This taxable value includes a reduction for 50% of a locally adopted optimal homestead exemption, and will affect state aid in the 2001-02 school year. The total number of students is for the current school year, i.e. 2001-02. The first wealth grouping classifies districts into ten subcategories with approximately equal numbers of districts in each, called deciles. The second grouping simply shows districts above and below state average wealth. The third wealth grouping classifies districts into 20 subcategories with approximately equal numbers of students in each. The six special statutory and 159 charter school districts form a separate group

in all three categories because they have no taxable property wealth.

Pupil Change: 99/00 - 00/01

This category looks at the growth or decline in student population over a one-year period. Districts where the total number of students declined represent one grouping, while the remaining groups show one year growth rate ranging from "0%-3%" to "10% and over."

Retention Rate

The retention rate was calculated by dividing the number of students retained by the total student count. Through the 1999-00 school year, the retention calculations included only students who were enrolled on the last Friday in October. Beginning in 1990-00, the retention calculations for Grades 7-12 included all students enrolled at any time during the fall.

SAT I/ACT: Percent Scoring At or Above Criterion

Districts are grouped into five subcategories based on the number of examinees who scored at or above the criterion score for either the ACT or SAT I in the previous year. The number of examinees meeting the criterion is divided by the number of examinees. A sixth subcategory is for those districts that have no test takers. The criterion score is 1110 for the SAT I Total and 24 for the ACT Composite.

SAT I/ACT: Percent Taking

Districts are grouped into three subcategories based on the number of prior year graduates who were administered either the SAT I or ACT, or both. The number of test-takers taking one or both tests is divided by the number of non-special education graduates. A fourth subcategory is for those districts that have no graduates.

Small/Sparse Adjustment

Districts are grouped into four small/sparse subcategories, or quartiles, with approximately equal numbers of districts in each. The category shows the amount of small/sparse adjustment as a percent of the total adjusted basic allotment amount. A fifth subcategory contains all districts receiving no small/sparse adjustment. This small/sparse percentage is a measure of the extent to which state

funding is adjusted to compensate for small and/or sparsely populated districts.

Student Density

Many years ago, the square miles in a school district were determined through a joint effort by the State Property Tax Board, now the CPTD, the Texas Education Agency, and the Texas Water Commission. School district maps provided by school districts to the CPTD were digitized by the Water Commission and acreage was determined. Density is the number of students per square mile. Density groups range from "fewer than five students per square mile" to "100 or more students per square mile." The six special statutory and 159 charter school districts form a separate group because mileage information is not available for them.

TAAS: Percent Passing All Tests Taken

For grades 3-8 and 10, the total number of students who passed all sections taken is expressed as a percentage of the total number of students taking one or more tests. Districts are grouped into five subcategories with the percent passing ranging from "under 73.7%" to "90.4% and over." These percentages exclude performance on Science and Social Studies in grade 8. Furthermore, these percentages include only those students enrolled in the district in October of the school year. These are the results used for accountability purposes. A sixth subcategory refers to districts not administering the test.

Wealth, see Property Wealth.

Wealth by Equal Pupils Per Group, see Property Wealth.

Notes on Appendix C

Note. All data about teachers, campus budgets, and students is from the fall submission of the Public Education Information Management System (PEIMS). College admissions and TAAS information are provided to the TEA by the test contractors. All data is for the 2000-01 school year with the exception of college admissions and dropout data which lag one year behind.

All Students

A cumulative total of students served at the campus during the school year. Students who dropped or migrated out of the Texas public school system after the first year were excluded from the total student count, as were students new to the system in the second year. Students who enrolled both years or graduated were included in the total student count.

Average Student/Teacher Ratio

In this category, campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory, "Not Applicable," pertains to campuses reporting enrollment but no teachers. Average student/teacher ratio is obtained by dividing the total number of students in membership by the total teacher FTE count.

Average Teacher Experience

In this category, campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory, "Not Applicable," pertains to campuses reporting enrollment but no teachers. Weighted averages are obtained by multiplying each teacher's FTE count by years of experience. These amounts, when summed for all teachers within a campus and divided by the total teacher FTE count within that respective campus, result in the average years of teacher experience.

Average Teacher Salary

In this category, campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory, "Not Applicable," pertains to campuses reporting enrollment but no teachers. Average teacher salary is calculated as the total salary of teachers divided by the total FTE count of teachers. The total salary

amount is for regular duties only and does not include pay for any supplemental duties.

Campus Accountability Rating

This category refers to the campus rating based on the 2001 accountability system. A campus' rating is based on performance on the Spring 2001 TAAS and the 1999-2000 dropout rate. The four levels of accountability ratings for campuses and the *general* conditions of each of the criteria for 2001 are as shown:

Rating	TAAS	Dropout Rate
Exemplary	>=90%	<=1.0%
Recognized	>=80%	<=3.0%
Acceptable	>=50%	<=5.5%
Low-Performing	<50%	>5.5%

Some campuses are shown as "Alternative Education," "Not Rated," or "Not Applicable." "Alternative Education" campuses are evaluated separately and are categorized as either AE: Commended, AE: Acceptable, AE: Needs Peer Review or AE: Not Rated. "Not Rated" campuses include first-year charter schools, charters with insufficient data, or the pre-kindergarten, kindergarten, or early education centers that are not rated because standardized test data are not available at those grade levels. "Not Applicable" campuses are those non-charter schools with insufficient data to evaluate.

For a more detailed explanation of the accountability system, see the 2001 Accountability Manual (TEA, 2001b).

Campus Type

Campuses are classified into four types according to the range of grades offered. Total membership information as reported to the TEA is used to construct grade ranges. The type classifications are:

- 1. Elementary Schools
- 2. Middle and Junior High Schools
- 3. High Schools
- 4. K 12 Schools

For a more extensive review of grade ranges, please refer to the grid in Exhibit C in the appendix of the Texas Education Agency (TEA) Snapshot publication

93

(TEA, 2002c), which presents the possible combinations of low and high grades for each of the campus types.

Enrollment Groupings

Campuses are grouped by size into five subcategories based on their number of students in membership. This is the total number of public school students who were reported in membership on a day in late October of each year. It does not include students who are served by the campus, but are not in membership there.

Instructional Cost Per Pupil

Instructional costs are the sum of expenditures budgeted for all activities dealing directly with the instruction of pupils, including instruction through the use of computers, and managing, directing, supervising, and providing leadership for staff who provide instructional services. The per pupil amounts are the current school year budgeted expenditures divided by the current number of students in membership. Campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory refers to campuses with no reported instructional costs.

Number Retained

To determine the number of students retained in grade, fall enrollment data were compared to attendance in the final, six-week period of the previous school year. Students enrolled in the same grade in both years were counted as retained.

Percent Economically Disadvantaged (Low Income) Pupils

Percent low income is the number of students reported as economically disadvantaged on PEIMS, expressed as a percent of the total number of students. Districts report students as economically disadvantaged if they meet any of the following conditions:

- a. eligible for free or reduced-price meals under the National School Lunch and Child Nutrition Program;
- b. from a family with an annual income at or below the federal poverty line;
- c. eligible for AFDC or other public assistance;

- d. recipients of a Pell Grant or comparable state program of need-based financial assistance;
- e. eligible for programs assisted under Title II of the Job Training Partnership Act.
- f. Campuses are grouped into one of five subcategories with the percent economically disadvantaged ranging from "under 22.9%" to "82.0% and over."

Percent Minority, African American, and Hispanic Pupils

In these categories, campuses are grouped according to the ethnic composition of their student populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white populations expressed as a percent of the total. The non-white populations include Native American or Alaska Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic. Each of the three categories has five subcategories with the following population ranges:

Category	Lowest Subcategory	Highest Subcategory
Minority Percent	Less than 20%	85% and over
African American Percent	Less than 1%	20% and over
Hispanic Percent	Less than 6%	60% and over

Percent Minority, African American, and Hispanic Teachers

In these categories, campuses are grouped according to the minority composition of their teacher populations, as reported on PEIMS. Minority percent is calculated as the sum of all non-white teacher FTEs expressed as a percent of total teacher FTEs. The non-white populations include Native American or Alaskan Native; Asian or Pacific Islander; African American, not of Hispanic origin; and Hispanic. Each of the three categories has five subcategories with the following population ranges:

Category	Lowest Subcategory	Highest Subcategory
Minority Percent	None	41.2% and over
African American Percent	None	19.1% and over
Hispanic Percent	None	34.2% and over

Percent of Teachers with Advanced Degrees

In this category, campuses are grouped into six subcategories with approximately equal numbers of campuses in the first five. The sixth subcategory refers to campuses with unreported teacher FTEs or campuses with no teachers with advanced degrees. The percent of teachers with an advanced degree is calculated as the FTE count of teachers with a master's degree or doctorate divided by the FTE count for all teachers.

Pupil Change: 99/00-00/01

This category looks at the growth or decline in student population over a one-year period. Campuses where the total number of students declined are represented with negative percent change values. Categories with positive growth rates range from "-1.7% to 1.8%" to "6.6% and over." The last grouping, "New Campuses," refers to campuses reporting students in the fall of 2000 for the first time.

Retention Rate

The retention rate was calculated by dividing the number of students retained by the total student count. Through the 1999-00 school year, the retention calculations included only students who were enrolled on the last Friday in October. Beginning in 1999-00, the retention calculations for Grades 7-12 included all students enrolled at any time during the fall.

SAT I/ACT: Percent Scoring at or Above Criterion (99-00)

Campuses are grouped into five subcategories based on the number of examinees who scored at or above the criterion score for either the ACT or SAT I in the previous year (1110 for the SAT I; 24 for the ACT). The number of examinees meeting the criterion is divided by the number of examinees. A sixth subcategory is for those campuses that have no college admissions test takers.

SAT I/ACT: Percent Taking (99-00)

Campuses are grouped into five subcategories based on the number of graduates who were administered either the SAT I, the ACT, or both. The number of test-takers taking one or both tests is divided by the number of non-special education graduates. A sixth subcategory is for those campuses that have no graduates.

TAAS: Percent Passing All Tests Taken

For grades 3-8 and 10, the total number of students who passed all sections taken is expressed as a percentage of the total number of students taking one or more tests. Campuses are grouped into five subcategories with the percent passing ranging from "under 71.3%" to "91.5% and over." These percentages exclude performance on Science and Social Studies in grade 8. Furthermore, these percentages include only those students enrolled in the district in October of the school year. These are the results used for accountability purposes. A sixth subcategory refers to campuses with no students tested on the TAAS.

Compliance Statement

Title VI, Civil Rights Act of 1964, the Modified Court Order, Civil Action 5281, Federal District Court, Eastern District of Texas, Tyler Division.

Reviews of local education agencies pertaining to compliance with Title VI Civil Rights Act of 1964 and with specific requirements of the Modified Court Order, Civil Action No. 5281, Federal District Court, Eastern District of Texas, Tyler Division are conducted periodically by staff representatives of the Texas Education Agency. These reviews cover at least the following policies and practices:

- 1. acceptance policies on student transfers from other school districts;
- operation of school bus routes or runs on a nonsegregated basis;
- 3. nondiscrimination in extracurricular activities and the use of school facilities;
- nondiscriminatory practices in the hiring, assigning, promoting, paying, demoting, reassigning, or dismissing of faculty and staff members who work with children;
- 5. enrollment and assignment of students without discrimination on the basis of race, color, or national origin;
- 6. nondiscriminatory practices relating to the use of a student's first language; and
- evidence of published procedures for hearing complaints and grievances.

In addition to conducting reviews, the Texas Education Agency staff representatives check complaints of discrimination made by a citizen or citizens residing in a school district where it is alleged discriminatory practices have occurred or are occurring.

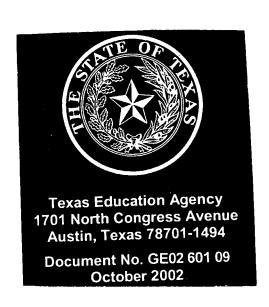

Where a violation of Title VI of the Civil Rights Act is found, the findings are reported to the Office for Civil Rights, U.S. Department of Education.

If there is a direct violation of the Court Order in Civil Action No. 5281 that cannot be cleared through negotiation, the sanctions required by the Court Order are applied.

Title VII, Civil Rights Act of 1964 as Amended by the Equal Employment Opportunity Act of 1972; Executive Orders 11246 and 11375; Equal Pay Act of 1964; Title IX, Education Amendments; Rehabilitation Act of 1973 as Amended; 1974 Amendments to the Wage-Hour Law Expanding the Age Discrimination in Employment Act of 1967; Vietnam Era Veterans Readjustment Assistance Act of 1972 as Amended; Immigration Reform and Control Act of 1986; Americans With Disabilities Act of 1990; and the Civil Rights Act of 1991.

The Texas Education Agency shall comply fully with the nondiscrimination provisions of all federal and state laws, rules, and regulations by assuring that no person shall be excluded from consideration for recruitment, selection, appointment, training, promotion, retention, or any other personnel action, or be denied any benefits or participation in any educational programs or activities which it operates on the grounds of race, religion, color, national origin, sex, disability, age, or veteran status (except where age, sex, or disability constitutes a bona fide occupational qualification necessary to proper and efficient administration). The Texas Education Agency is an Equal Opportunity/Affirmative Action employer.
